PhotoBook

The Equipment

- Stapler & Staples
- Training Video
- Assembly Guide
- PhotoBooks & Cover Sheets
- Picture Maker PhotoBook templates

The Process

Your customer selects images, decides on a size from 4x6 to 8x10, and prints from pre-formatted templates residing in your Picture Maker kiosk with the MyPhotoBook software enabled.

You then take the finished pages, place them between the end sheets, insert into the assembly guide and staple the entire group together. Then the bound photos are placed into the PhotoBook by removing the adhesive strips and adhering to the cover. The staples and binding remain hidden to achieve a high quality book appearance.

The Result

Providing a quality yet inexpensive PhotoBook to your customer encourages additional printing for anniversaries, holidays, birthdays, birth announcements and memories. This additional printing ensures your kiosk is used year round.
