

ICC profiles that are included with the Pro 4800 are labeled by their acronyms. This list has been created to clear up the confusion the acronyms may cause. Firstly any profile ending in MK is to be used when the Matte black is loaded as the primary black, and PK is for Photo black. Any profile ending in 250 is intended for the roll stock of that particular media. These profiles are intended for use with any driver resolution available. Included is a part number to help locate each paper using the Epson website search box. These are just examples other part numbers will exist for different sizes of the same media.

Pro4800 ARMP.icc = Archival Matte Paper (N/A same as Enhanced Matte)
Pro4800 EMP.icc = Enhanced Matte Paper (S041341)
Pro4800 PGP.icc = Photo Glossy Paper (S041778)
