Productivity with exceptional color, detail, and quality.

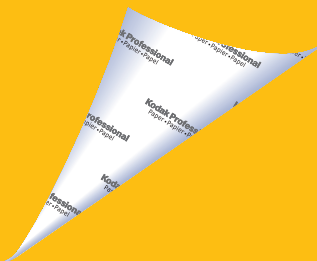

KODAK PROFESSIONAL Inkjet Photo Paper—a high-quality, instant dry paper that is universally compatible with dye and pigment based inkjet printers. From professional to advanced amateur photographers, this paper provides a benefit to everyone. KODAK PROFESSIONAL Inkjet Photo Paper features a true photographic base with high-quality pulp and state-of-the-art paper chemistry that give it the look and feel of real photographic paper. With a range of downloadable custom color ICC profiles developed for popular inkjet printers, cut sheet inkjet photo paper delivers bright, saturated color, sharp detail, and overall outstanding image quality. All this without the distracting surface defects often observed

with prints from pigmented ink printers. With these unique and outstanding attributes, it could only be a KODAK PROFESSIONAL Product.

In addition to the wide range of cut-sheet sizes, our professional high-quality paper is now available in roll sizes. Available in 10-, 16- and 24-inch-wide by 100-foot rolls, KODAK PROFESSIONAL Inkjet Photo Paper offers you increased productivity and efficiency in your printing workflow. As an in-studio printing solution, long rolls provide you the ability to offer rapid delivery of enlargements, quick reprints, proofs and final last-minute additions to your customer's order.

Printing

Your printer came with profiles that are specific to the manufacturer's paper, but all papers are made slightly (or dramatically) different. By using the profiles we made specifically for your printer (along with the correct Printer Driver settings), you'll get the best possible prints on KODAK PROFESSIONAL Inkjet Photo Paper. If you're looking for color predictability and consistency, download the profile for your printer and operating system, and get the results you expect – time after time. Because new profiles are continuously added to our web site, be sure to visit www.kodak.com/go/proinkjet if your printer is not listed below.
